### EDITORIAL.

By the time this copy of the Magazine issues from the press, we shall all be looking forward to the holidays and the festivities associated with Christmas. We take this opportunity of wishing all our readers a Merry Christmas and a happy and prosperous New Year.

Unfortunately, there was only a fair response to our numerous appeals for contributions, but we are encouraged by the fact that there are still some boys who have the welfare of the Magazine at heart.

It will be realised that some articles have not been published in this number. Some may be included in the next issue of the Magazine. We are grateful to those who handed in articles, stories, poems, etc., and trust they will continue to support the efforts of the Editors.

We are pleased to state that the various social activities of the School are well supported, and such societies as the Literary and Debating Society, the Welsh Society, the Scientific Society, and the Metalwork and Engineering Club are making progress.

In conclusion, we thank Mr. John for his encouraging support, and Mr. D. D. Phillips for his kind assistance.

## SCHOOL NOTES.

The Dorian Trio visited the School on Monday, 14th of November. They played a delightful programme of music and we spent a very pleasant and instructive period listening to them. Unfortunately, their visit on this occasion was of unusually short duration owing to an engagement elsewhere. We look forward with pleasure to their next visit.

Several members of the Staff have paid a visit to Mr. Abraham who has been ill for some time. We hear encouraging news of his progress, and hope that he will soon be restored to health.

We regret to announce that Mr. Way has been ill for some weeks. He, too, is making good progress and we sincerely hope that he will soon be able to return to School again in good health.

Mr. Bowen, Mr. Howells and Mr. Jones, students from the University College, are engaged in teaching practice in the School. We extend a hearty welcome to them all.

We should like to thank Mr. B. Jones of Barclay's Bank for his kindness in coming to speak to us on Banking as a profession.

The "assistant français" this year is M. Papin who hails from Moulins (Allier) in Central France. He has already settled down to the methods and customs of the School, and is very popular with the boys. We wish him a very pleasant stay in Swansea.

The "Comédiens de Paris" visited Swansea on the 29th of November, and presented Molière's comedy "L'Avare" at the Empire Theatre. They played to a packed house of school children from Swansea and District, who greatly appreciated them. Among the audience was a large contingent from Dynevor.

The School commemorated the Armistice in the usual way. After the service Kenneth E. Jones, the Head Prefect, placed a wreath of poppies on the School Roll of Honour.

"They shall not grow old as we that are left grow old,  
Age shall not weary them, nor the years condemn.  
At the going down of the sun, and in the morning,  
We will remember them."

The School was, as usual, represented by a number of masters and boys in the Mayor's procession from the Civic Centre to Wesley Chapel. Unfortunately, the weather

was bad and many who had looked forward to being initiated into this part of their Civic duties, were unable to join us.

A large building is in course of erection near the playground. The noises emanating from its interior vie with those to which we have long been accustomed in Dynevor Place. Among the workmen are some excellent whistlers and soloists. Unfortunately, the thought of the C.W.B. exams prevents us from appreciating their efforts.

---

### A VISIT TO DENMARK.

Two years ago, a party of Danish boys paid a visit to Swansea, and this year a party from the school were fortunate enough in being able to return the compliment. The party consisted of Mr. John, Mr. Hopkins, Mr. Powell, Mr. D. I. Williams and thirteen scholars, as well as Mrs. Hopkins. We left Swansea on the 31st of July. Our outward journey was a pleasant one, especially from Harwich to Esbjerg. We were given a rousing reception when we arrived at Copenhagen.

The first thing that attracted our attention was the cleanliness of the Danish race. The streets were devoid of litter (what a contrast to Swansea!), and the houses were also spotlessly clean. All the main buildings were kept in a clean condition, both inside and out. Copenhagen is a wonderful city from an architectural standpoint. It is often given the name of "city of many towers."

As we expected, the Danes were very hospitable. Wherever we went we were given a cordial welcome. We were entertained in the Town Hall by the mayor of Copenhagen, who was presented with a souvenir from Swansea by Mr. Hopkins. This souvenir was a polished block of anthracite with a barometer inset. We also visited the various factories of Copenhagen, such as the porcelain factory, cheese factory and the brewery, etc. After each visit we were entertained to lunch by the managers of these concerns.

One day we paid a visit to North Zealand and during this trip we visited Kronborg Castle where "Hamlet" was performed by a German Company last year. Denmark is very flat and consequently cycling is a very popular pastime. We were informed that in Copenhagen alone there are over 400,000 bicycles in use.

It was such a pleasure for us all to meet Herr Giodesen and his boys in Copenhagen again. Herr Giodesen had

worked so hard to make our visit a success. Rektor Nielsen, the Headmaster, gave us a splendid welcome and entertained us to tea.

Altogether we had a very enjoyable holiday, and we were blessed with continual sunshine. Just think of it, not a cloud to be seen for a fortnight! But as soon as we reached England on our return journey, it began to rain. What a characteristic "Welcome home!"

We are very grateful to Mr. Hopkins for having organised the trip for us. Herr Giodesen and he worked in collaboration for many months before our departure. What delightful contacts we made in Denmark!

We regret to say, that one of our party, Hilton Gardiner, has since passed away. His Danish friends have sent flowers to put on his grave, and a very sincere letter of condolence to his sorrowing parents.

"GURLI," L.VI ARTS.

### **ECHOES FROM THE OLD BOYS' SUPPER.**

The Mayor, Councillor W. D. Rees, told the Old Boys at the Supper that in his early days at the Cwmbwrla School it was by no means uncommon for a boy to be at one and the same time pupil and nursemaid. There was nothing strange in a boy's coming to school with the family baby bound tightly to him by a shawl in the orthodox Welsh fashion.

It occurs to us that such a boy, being for the time, "in loco parentis" would naturally be on his best behaviour, were it only to impress his infant brother or sister; but, in the event of the "old Adam" in the boy breaking out, causing him to backslide, and once more be "in statu pupillari" and so deserving of punishment, would he then be considered as a parent or a pupil? To punish the pupil would be to assault a parent.

The Mayor recalled the time when the class of which he was a member at the elementary school gathered round the fire under the light of a primitive oil lamp.

Those must have been the "Dark Ages"; but, at least, it may be claimed that boys could be trusted near oil lamps. In these more "enlightened" days accidents would undoubtedly have taken place which would probably have resulted in our moving to "fresh woods and pastures new", away from the bells, backfires, motor-horns, rush of buses, wireless, etc., etc. of Dynevor Place.

## THE SCIENTIFIC SOCIETY.

The Scientific Society has resumed its activities this term and has attracted a large following.

As usual, the first lecture of the term was given by the President of the Society, Mr. John, who chose for his subject—"The Age of Power." This lecture was an excellent beginning for the term's programme, and knowing how busy Mr. John is at the beginning of a term, we are very grateful to him for accepting the invitation to give the first lecture.

This was followed by a lecture on "The World of Sound," given in two parts by Mr. D. I. Williams. The lecture was illustrated by lantern slides, and proved extremely interesting to the large crowd present on each occasion.

F. Richards, Upper VI Science, next lectured on "Blood," and this meeting was also well attended.

There is one more address to be given this term by J. E. Thomas, Upper VI Science, on "Colour Photography."

Many new books have been added to the Scientific Society Library this term. Most of the members continue to make good use of the Library.

Members of the Society are grateful to the following masters who have interested themselves in it—Mr. John, Mr. D. I. Williams, Mr. W. J. Lewis, Mr. George and Mr. Gregory; and also to the following committee which has done its work remarkably well:—

Chairman—D. B. Scully, Upper VI Science.

Vice-Chairman—B. Lloyd, Upper VI Science.

F. Richards—Upper VI Science.

J. Hopkins, R. Hullin—Lower VI Science.

P. Morris, R. Williams—Upper V.

B. Nicholson, Wright—Va.

J. Richards, M. Schorr—Vb.

M. Yorke, R. Owens—Vc.

Towards the end of the term, about forty members went on a conducted tour of the General Post Office. The party, under the charge of Mr. W. J. Lewis, was shown the manual exchange, the telegraph office, and the mail-sorting rooms, all of which were extremely interesting. The Society is grateful to Mr. D. I. Williams for arranging the visit.

Last, but not least, many thanks to the boys, who, as members of the Society, have made this term's activities such a success.

GEORGE EVANS, SECRETARY.

## SOME SNAP SHOTS OF THE TRIP TO DENMARK.

It would be impossible, in the space-allotted to us, to give a satisfactory account of all the various activities provided by the trip to the "oldest the wisest and the happiest Kingdom in the world," but we shall try to compress into a few paragraphs the "high-spots" of the holiday, which was voted to be easily the best spent by the whole of the company. We shall pass over the twenty-four hours sea-trip, which was perfect in every respect, with just one reference to our initiation to Smorrebrod. 'Smor' means 'butter,' and 'brod' means 'bread' and the combination means 'smeared bread'—an open sandwich on which is 'smeared' a legion of items—every kind of fish, shellfish, meat (fresh, salt, or smoked), poultry, game, sausage, eggs, salad, vegetables and cheeses of all the nations in the civilised world. It is the glory of the Danish table, and its colours include almost all the shades of the rainbow. We were told that there were well over 150 items that could be chosen for the "smearing" purpose and when one remembers, too, that there are four kinds of bread—rye, white, sour, and crisp, one's choice is enlarged to over a hundred types of sandwich.

Arriving at Esbjerg, we put up at the Mission-hotellet where we were immediately impressed by its religious atmosphere, for in the all the bedrooms, Bible texts, pious pictures and devotional literature were to be seen. We were informed that prayers were held every morning and that the attendance of all the servants of the hotel is compulsory, and that of the guests optional.

It was here that we experienced our first "sleep" in a Danish bed—a feather bed—two of them in fact, because we discovered, after some considerable time, that we had to sleep on one and under the other—no blanket or sheet into which we could tuck ourselves, and we felt convinced that we had either to be acrobats, or to be born in Denmark to be quite comfortable and warm on a cold winter's night!

At Copenhagen we were met by our hosts. No words of ours could ever express the cordiality of their welcome and their unbounded hospitality during the whole of our stay. We were greatly impressed by their well planned, comfortable homes, their happy home life, their efficiency, their calmness, their highly cultivated tastes. We would like to congratulate them heartily on their perfect mastery of our language. Wherever we went, whether it was to private

homes or business houses, we were amazed at the ease with which everyone spoke to us in our own language, and we were glad that it was not necessary in the terrific heat, to open dictionaries and struggle with the intricacies of pronunciation! Someone has said that to speak Danish correctly, you must either be drunk or have no roof to your mouth. There is quite a lot of truth in the statement!

What impressed us most in the streets was the countless thousands of cyclists—we were told that there were over 400,000 bicycles in Copenhagen alone, and there are parking places for them outside offices, amusements places and restaurants. Everybody rides one from members of parliament and business men down to the humblest clerk and drudge, the sweep in his bottle-green uniform and tight breeches, and the postman in his scarlet-red tunic. We were struck by the absence of police and the universal cleanliness of the streets. Of the various buildings that we visited in the city, and the castles outside, each is worthy of an article but two things impressed us very much—the Grundting Church and the bird's eye view of Copenhagen seen from the top of the Town Hall Tower. Below us were thickly dotted (the Danes have ever been fond of towers)—copper-green spires, domes, turrets, minarets,—a wonderful company, some round, some onion-shaped, some twisted, some like heavily ringed fingers pointing skywards. The buildings of the Grundting Church was started in 1921 and is still in process of erection. The steeple, the walls, inside and out, the floors, the arches, vaults and columns, are all of yellow brick and the world-famous façade gives, at a distance the impression of a mighty organ.

Other vivid memories, in brief and unsorted, are the Arcadian simplicity of Tivoli; the wonderful bathing facilities; the cigar smoking ladies in the restaurants; the storks nesting on farm chimneys; the delicious coffee served everywhere; the friendliness of the Danish girls and their eagerness to speak English; the custom of saying, "Tak for Mad" (Thanks for the meal) to your hostess and her unfailing reply "Welbecom" (May it digest or agree with you); the practice of placing lit candles on the dining table during the meal; the custom of hoisting a flag and placing three wreaths on a new house as soon as the roof-frame is complete; the hospitality of the manager of the Tuborg Brewery; the wonderful day spent with the hundred schoolgirls from London and Cambridge at the State Dairies; the visit to Fredericksborg and Kronberg (Hamlet's Castle); the boat trip to Sweden, when we forgot our

passports; the cream served with the fruit at the Kongo-parken Hotel Malmo, which turned out to be mayonnaise sauce; the musical efforts of three members of the staff who tried to convince Scandinavian travellers on the boat that Welshmen are born singers; the Langelinie Promenade with its wonderful statues of Geifion with four bulls at one end and the charming Little Mermaid at the other; the beautifully clean farms; and so we could multiply such personal, inconsequential memories which the mind will continue to sift whenever we glance over our diaries or open our snapshot albums.

"SKAAL."

---

### A VISIT TO THE EMPIRE EXHIBITION.

The Empire Exhibition at Glasgow will be remembered by visitors as one of the world's wonders of this age. I enjoyed every minute of my visit. The Exhibition was at Bellahouston Park, Glasgow, and it would have required a full week to visit all the pavilions. We entered at the Ibrox entrance, and made straight for the tower.

After ascending, we were delighted by an eighty-mile view of the surrounding country, and a panorama of the Exhibition. I walked for miles that day, and was greatly impressed by the wonders and variety of the exhibits. The various pavilions where the products and exports of our colonies were on view, provided food for thought, and some reason for national pride, and will always remain in my mind.

What impressed me most, however, was the Engineering Pavilion. Every part of the Empire had sent exhibits, and, I was led to realize that the real builders of the Empire were the engineers, the men who drained swamps, who cleared the jungle, who built the roads and railways, constructed bridges and dams; work which enabled colonists to settle and prosper in what we now describe as 'The Empire Overseas.' Scotland was well represented by the 'Ann-Clachan,' which means the Highland Village.

It aroused many memories in the minds of returned exiles, and gave to others a real impression of 'Bonnie Scotland.' The Victoria Falls were wonderful, as was also the Pleasure Beach, and I shall always remember my visit to the Glasgow Exhibition, 1938.

C.B., IVc.

### THE OLD DY'VORIANS.

On Wednesday, October 19th, the Old Dy'vorians held a supper at the Mackworth Hotel to honour the Mayor, Councillor W. D. Rees, as the first Old Boy of the school to become Mayor of Swansea.

The function was one of the most successful in the history of the Association: over 120 Old Boys being present to welcome and congratulate the guest of honour.

Among the Old Boys present was a father accompanied by his son, and another father, escorted by his two sons—who explained that a third son, also an Old Boy, would have been present but for the fact that he was unavoidably detained elsewhere.

Mr. Arthur Jones ably presided, and was supported by Alderman P. Morris, Rev. W. Francis, and Mr. W. R. Francis, past presidents, and Mr. Llewelyn John, the Chairman of the Association. Among the guests were Mr. M. H. Davies, H.M.I.; Mr. W. J. May, Chief Constable; and Mr. D. H. I. Powell, Editor of the "Evening Post."

Alderman P. Morris proposed the health of the guest of honour, and paid tribute to his sterling qualities, credit for some of which, he said, the mayor would undoubtedly give to his old school. During his year of office, a very difficult one, he had fought an uphill battle for the prestige and prosperity of the town, the results of which would be seen in the future.

Responding to the toast, the Mayor recalled the time he had spent as a pupil in the old School in Trinity Place, when it was known as the "Higher Grade." Since those days the School had not only changed its name, but had also extended its curriculum, so that the pupils of today were able to receive advantages far superior to those enjoyed by his generation. The School had gone on from strength to strength, and, while congratulating it on its excellent record, he hoped that the present pupils would avail themselves in the fullest degree of the privileges which were at their disposal.

Mr. H. M. Davies, H.M.I., proposing the toast of the Association, said that he was always glad to visit the Dynevor School. He found there that indefinable but all-important atmosphere which was so essential to the success of a school. The School gave pupils the stamp of character.

The Chairman, appealed for further support, and Mr. John congratulated the Old Boys' Association upon the biggest gathering in its history.

### SENIOR CRICKET.

The School had a very successful season this year, losing only two matches out of eleven played.

The return match with Pontardawe S.S. at Townhill had to be cancelled owing to rain. This was unfortunate, as the School might have been able to wipe out last year's defeat.

The return match with Glanmor was a high scoring affair. Glanmor batted first and scored 120 before they

were all out. The School batsmen were in fine form, however, and Glanmor's total was passed for the loss of five wickets..

The match with the Old Dyvorians was cancelled owing to rain. The next match against Gowerton at Townhill ended in a draw the scores being School, 102 for 2 dec.; Gowerton, 60 for 5 wkts.

The next match was against the staff and once again the boys were victorious, winning comfortably by four wickets. The staff batted first and scored 148—8 before they declared. Mr. W. T. Davies played a very fine innings of 33 and Mr. Gregory knocked up 30 in very quick time. The School started badly, when they batted, but the later batsmen settled down and the staff's total was passed for the loss of six wickets.

The last match of the season was against Gwendraeth V.S.S. at Tumble. Owing to lack of time, the match was made a 'time-limit' one. The School batted first and scored 98 in the allotted time of an hour. Gwendraeth then batted, and amid great excitement, they passed the School's total in the last over.

On behalf of the committee I should like to thank Mr. John for the interest he has shown in the team and also Mr. Evans for his unlimited efforts. The juniors must also be complimented for the way they supported the School Team during the season.

The most successful batsmen this season were, B. Lloyd who scored 366 runs in seven innings, and A. Arnold who scored 129 for four completed innings. A. Arnold was also the most successful bowler, taking six wickets for 41 runs. D. Richards took six for 42 and B. Lloyd took 16 wickets for 155 runs

# **CRICKET TEAM.**

E. Rees, H. Hughson, J. Catley, H. Smith, A. Arnold, W. Watkins, K. Gubb, J. Richards,  
 Mr. W. S. Evans, I. Morgan, D. T. Richards (Captain), W. B. Lloyd, Mr. Llewelyn John,  
 K. Way.

Colours were awarded to D. Richards, A. Arnold, E. Rees, K. Way and W. Watkins. B. Lloyd and H. Mort were awarded dates.

BERNARD LLOYD, HON. SEC.

### SCHOOL XV.

CATLEY:—A full back of fairly good quality. Has a strong kick and plenty of speed and polish. Takes most places kicks. Also plays well at centre.

J. I. HOPKINS:—A fairly speedy winger but lacking in football sense. Usually runs into opposition.

J. SIMS:—The other winger. Rather small. Has speed and goes for his man. His first season of rugby but is not apparent in his game.

WILY WATKINS:—Another good kicker but he does not use his ability to advantage. Has speed but usually tries to beat one too many. He should remember that there are fourteen other players on his side. Has yet to learn to tackle.

JEFF PITCHFORD:—A player whose slightness is taken full advantage of by the opposition (remember the Gowerton match Jeff?). His efforts to break through or use his weight (?) are swamped by players twice his size. His second season.

JACK RICHARDS:—On the small side. Too fond of fly kicking and persists in thinking he is playing soccer. One of the few who follow up.

W. POPE:—A hardworking scrum-half whose efforts are usually wasted. WHEN he succeeds in beating the other inside-half, the ball seldom reaches our other backs. He is too fond of sticking to the rules.

D. E. REES:—Vice-Captain. A veteran who has only played in three games. Did not play up to his usual standard. Like Watkins his dummies are well-known to the opposition and strictly conventional.

I. MORGAN:—Lock. Rather slow but has a fairly reliable tackle. Also plays full back and has a safe, if not brilliant, kick. Colours last year.

E. HARRIS:—Winging forward. Light but with a fair amount of speed. Looks like a footballer. Has a mania for picking ball out of scrum.

C. S. JONES:—Captain. A fine forward though he has not yet settled down to his usual standard. It is quite true that his chest often frightens the smaller members of the opposition. Had colours last year.

**B. COSLETT:**—Second rank forward. His first season of rugby. Lacks polish, but is a good all rounder who is certainly tough.

**E. Cox:**—Sturdy and reliable supporter of Coslett. Gives as good as he gets—and he gets quite a good few solid bangs.

**D. WALES:**—Front rank forward. Has good style but is rather slow. He knows what to do with the ball, which is more than can be said of some of the players. We hear he had a reputation in the Juniors. This has only been justified to a certain extent.

**V. RADFORD:**—Hooker (?). Gets the ball back sometimes. When he does, it is usually blocked by the second rank. Perhaps he is discouraged. A good player in the loose. In the scrum confines his remarks to the other hooker who is shocked. His rule is never to shave two days before a match.

**J. B. R. BATTLE:**—The other front rank forward. A really brilliant forward. Though there are one or two (?) mistakes these are usually due to lack of support from the team. Does well in the loose and likes a hard, scrappy game. Has yet to score. This is due to hard luck which also followed him during the last season for which he was awarded his well deserved colours. Has unparalleled style of tackling. Briefly, he is the star man of the team.

The Author wishes to remain anonymous.

### JUNIOR SOCCER.

At the end of the first half of the season, it can well be said that the School Team have been very successful, since they have won three matches out of a possible four.

Although losing to Plasmarl 3—0, the School have since improved, their defence being an outstanding feature, and they beat Pentrepoeth 1—0, Sketty 1—0 and Danygraig 2—0.

J. Budge and C. Williams were given Town-trials but were not successful. J. Budge was elected Captain of the team and S. West Vice-Captain.

Played. Won. Lost. Drawn. Goals For. Goals Against.

4            3            1            0            4            3

J. BUDGE, VA.

**PREFECTS.**

J. G. Morris, J. H. Hanney, K. E. Jones, R. D. Matthews, D. B. Scully, W. Price,  
T. G. Evans, G. B. Thomas (Head Prefect), Mr. Llewelyn John, A. L. Roberts (Deputy Head Prefect), A. Hughes.

## THE SWIMMING CLUB.

The most important event this term was the Annual Gala which was held on September 29th. This was a social and financial success. Alan Taylor won the Senior Championship in the excellent time of 63 <sup>3</sup>/<sub>5</sub> secs, and Alan Thomas was the Junior Champion.

The Junior Squadron, A. Thomas (Capt.), D. Hill, H. Kanter, N. Blyth, has had a successful year, winning the Durk & John Llewellyn Cups. They were also runners-up in the Junior

Squadron Championship of Wales at Gelli-Galled Baths, Llwynypia.

As a result of the National Fitness Campaign many non-swimmers began to learn to swim, and it is unfortunate that the Baths are now closed. It is hoped that these beginners will continue their efforts next season.

C. Davies and A. Taylor played in the Swansea Junior Polo Team, which reached the final of the Peter Freeman Knock-Out Competition.

W. Price played for Glamorgan Juniors against Monmouth.

We congratulate Old Boy Trevor Lewis, who played for Wales against Scotland, and also won the Pier to Pier swim.

C. GOLDSTONE.

---

## LOWER VI SCIENCE FORM NOTES.

Do you know:—

1. Who the nightingales were, from the L.VI Sc., who took part in the first Welsh Society Meeting?
2. What is the language of "allsintances"?
3. What is the chief relaxation of the L.VI Sc.? Why is there so much money about the form-room?
4. Who thought his car stronger than a lamp-post in Morriston some time ago?
5. Who is the boy who tries to shave and cuts his hair the same time?
6. Why did the result of the mixture of yeast and sugar disappear so mysteriously?
7. Why does the School Orchestra depend so much upon the Lower VI Science?

R.M., L.VI Sc.

### OLD DY'VORIANS WHIST-DRIVE.

Old Dy'vorians spent a very enjoyable evening on Friday, November 25th, when they held a Whist-Drive and Smoker in the School Hall.

Prior to the evening's proceedings, they were delightfully entertained by the well-known radio and variety artists, the Two R's, the Senior Partner being Mr. Ray Jones, himself an Old Dy'vorian.

Among those present were the President, Mr. Arthur Jones, the Headmaster, Mr. Llewelyn John, Councillors Mainwaring Hughes and S. C. Jenkins and some of the members of the School Staff.

At the Whist-Drive, the prizes were awarded to Councillor S. C. Jenkins, and to Mr. Tom Walters, playing as lady.

### LITERARY AND DEBATING SOCIETY.

The Society has had a very successful session. The meetings have been enthusiastic and well-attended, and a very pleasing feature has been the large number of speakers from the floor.

Four debates have been held as follows:—

October 18th:—"That the school-leaving age should be raised."

Opening Speakers:—

Affirmative: J. O. Davies and T. G. Sims.

Negative: K. Williams and W. Pope.

November 3rd:—"That Democracy is proving itself a failure."

Opening Speakers:—

Affirmative: P. J. Watkins & H. Cunningham.

Negative: G. Pitchford and G. Neilson.

November 16th:—"That Nationalism is proving itself a dangerous and out-of-date creed."

Opening Speakers:—

Affirmative: H. Thomas and R. Thomas.

Negative: K. Jones and I. Morgan.

November 25th:—"That Science does more harm than good."

Opening Speakers:—

Affirmative: P. Jones and H. Hughson.

Negative: G. Evans and H. John.

The next meeting, held on December 8th, was a House Competition Meeting, and consisted of spelling bees, general knowledge competitions, impromptu speeches, best speech on a set subject, etc. This proved itself to be a fine ending of a very successful term, and in conclusion I desire to thank Mr. John, our President, Mr. Rees, as Chairman, and also Mr. Chandler, for their untiring efforts in making the Society what it is today. The Committee have helped a great deal in arranging the programme, and include G. Evans, J. Davies, G. Pitchford, P. J. Watkins, G. Neilson and H. Thomas.

BYRON JONES (Sec.).

## WHY SCHOOL-MASTERS DIE YOUNG or THE THINGS SOME "STUDENTS" SAY.

To the English Master:—

An anecdote is something you take after you have taken poison.

False doctrine means giving a man the wrong medicine.

The feminine of friar is none.

Tarzan is a short name for the American Flag. The full name is Tarzan Stripes.

Indirect speech is a speech not spoken by the person who is speaking.

To the Geography Master:—

An oasis is a futile spot in the desert,

Bamboo is the name of an Indian baby.

To the History Master:—

At one time, policemen were known as Scarlet Runners.

A territorial is a man who joins up after the war is over.

To the Physics Master:—

A vacuum is an empty space where the Pope lives.

To the Languages Master:—

These are far too numerous to mention.

And these two gems from a certain "scholar" kept Mr. X. awake for nights:—

Parallel lines are those which are the same distance all the way and do not meet unless you bend them.

A circle is a line running round a dot for ever.

**THE METALWORK & ENGINEERING CLUB.**

President:—MR. LLEWELLYN JOHN.

The officers elected for the year 1938-39 are as follows:—

Chairman. A. Brazier; Vice-Chairman. H. John; Secretary, W. Bate; Treasurer, W. Haines; Librarian, M. Schorr.

Towards the end of Term, a trip was to have been made to Pumpsaint, but owing to the closing down of the mine, the trip was cancelled. The date fixed

was Dec. 12th. Another trip is being arranged.

On Monday, Nov. 28th, Mr. Morris gave an interesting talk to the club on "The Modern Motor-Car."

The club has had some successful meetings this term, the average attendance being about 25. A surprising number of pokers have been made, and other models made include a deflagrating spoon and a tooth-brush rack.

The club meets as usual on Mondays from 4.15 to 5.30 in order to give boys in the 4th forms and upwards, further chance of making models of their own choice.

The club's annual "beano" takes place during the last week of Term, and all are looking forward to it with great enthusiasm.

W. BATE, Secretary.

**"TEXT OF THE ANTI-LITTER GOSPEL."**

I'm very glad that you should use these rocks for lunch or tea,

That you should share the beauty of this lovely spot with me—

But I should take it kindly if the next day I could find No paper, and no broken glass, nor food scraps left behind.

The paper looks untidy—'tis an easy thing to burn, The scraps that will attract the flies go bad and smell in turn.

The broken glass my waders cut, my dogs and children's feet, And all the three just spoil the charm for the next who stops to eat.

So if you'll be so very kind and clean, when done, with care, You'd earn the gratitude of one whose beauty spots you share.

This notice was found on an oak tree in the country of Hereford, and conveys to us a lesson which should be well-learnt.

B.J., L.VI.

DYNEVOR METALWORK SHOP.

*Photo. H. C. Morris.*

**LIFE-SAVING.**

It was announced by Mr. John in the Hall after the opening service on Monday, October 3rd, that the following boys had been successful in passing the Royal Life Saving Society's examination in the rescue and resuscitation of the apparently drowned:

Bronze Medallion: A. A. Brazier, L. J. Gwyther, D. Glass, E. Levine, J. F. Richards.

Intermediate Certificate and Bronze Medallion: — W. N. Blythe, J. Davies, S. Griffiths, H. Kanter, E. V. Millard, M. Schorr, A. R. Thomas.

Intermediate Certificate: T. J. Carroll, B. Hinchley, G. Maggs.

The examination was conducted by Police Inspector F. B. Chislett, who is himself an Old Boy, at the Swansea Baths. The boys had been trained by Mr. Burgess.

The medallions and certificates were presented to the successful candidates by Mr. John who congratulated them on their success, which reflected great credit on the School Swimming Club, of which they were all members, and on Mr. Burgess, who had trained them in life-saving.

---

**WE SHOULD LIKE TO KNOW.**

1. Why the boys of the L.VI Arts are so prompt in paying their sports-fees?
2. Why a certain member of the Rugby Team is told to be at the School Field a quarter of an hour before the others?
3. Who is the boy in the Upper Fifth who possesses a shirt that vies in colour and dazzle with the jersey of the Rugby Team?
4. Why is geology so popular amongst the members of the Lower VI?
5. Which official of the Rugby Team in making a speech at a certain school began, "Ladies, Gentlemen AND masters?"
6. What reasons have led two members of the Lower VI to "reform?"
7. Why was there such an epidemic of "colds" in the Lower VI during this term?
8. Who reads the fairy-tales in the School Library?

**"INAGROM."**

**C.W.B. RESULTS 1938.****Higher Certificate Stage.**

J. H. Hanney, Kenneth E. Jones, Ronald D. Matthews, Archie L. Roberts, Gwyn B. Thomas, Dewi B. Scully.

All were successful in obtaining L.E.A. Scholarships.

We congratulate them on their success.

**School Certificate Stage.**

We wish to congratulate the following boys on their results in the School Certificate Examination, 1938.

**U.Va.**—A. R. Arnold (M), J. B. Battle (M), Burford (M), Hixson (M), J. I. Hopkins (M), Hurley, Huxtable (M), G. B. Jones (M), R. J. Jones (M), C. G. Michael, T. I. Morgan (M), R. Mort, L. Parry, J. Peters (M), D. T. Richards (M), Rowcliffe, E. J. Thomas (M), J. G. Waltes, R. Williams.

**Va.**—Barnes, Brazier, Coslett, C. Davies, R. Evans, Godsall (M), Goldstone, Hanney, J. R. Jones (M), W. J. Jones, J. Leonard, A. Maddy, T. J. O'Connell, D. G. Riches (M), B. Squires, F. Taylor, R. Thomas, P. G. Wilson.

**Vb.**—G. Allen (M), W. Bate, Challacombe, Curnock, R. M. Davies, Hayward, Hullin (M), L. Jackson, Jewell, Latham, R. J. Leonard, A. Millichip (M), Parkes (M), Perrins, Pitman, H. Rees (M), H. L. Ridd, Thompson (M).

**Vc.**—Baldwin, Bowen (M), Hope, Hughson (M), Jacob (M), James (M), W. H. John (M), W. N. John, J. D. Jones, T. Jones (M), I. Phillips (M), D. E. Rees, E. E. Thomas (M), P. J. Watkins (M), R. Whitlock, G. Williams, H. J. Williams (M), J. Walters (M).

**Supplementary Certificate:**—R. Davies, T. Edmunds, W. J. Francis, L. Hopkins, B. Lloyd, G. P. Neilson, W. Pope, V. Radford, F. Richards, E. Thomas, K. Williams.

**OLD BOYS' SUCCESSES.**

We offer our heartiest congratulations to the following Old Boys, who have been successful in their examinations for Higher Degrees:—

G. Andrewartha on obtaining the M.Sc. degree.

M. H. Jones on obtaining the M.A. degree.

P. Elias on obtaining the M.Sc. degree.

Lyn Thomas on being selected to play in the Welsh Amateur International Trail at Cardiff.

T. Sullivan who now appears regularly in the Swansea Rugby XV.

DYNEVOR METALWORK SHOP.

LATHE WORK.

FORGING.

*H. C. Morris.*

**FORM NOTES—IVA.**

The Form is proud of the honour which has been brought to it by the achievements of Alan Thomas, who won the Junior Backstroke Championship and also the Junior Championship in the School Swimming Gala.

The Form is represented in the School Orchestra by three boys, R. Dahlgren, K. Davies and D. McLennan, all of whom play second violin.

S. West and J. Owen are members of the Junior Soccer Team.

L. Sharp plays for the Junior Rugby Team.

The Form is represented in the Metalwork Club. Several boys are looking forward to the visit which the members of the Metalwork Club are paying soon to the gold-mine at Llanpumpsaint.

**FORM NOTES—L.VI Arts.**

It is very gratifying to see the members of the Form taking such active interest in School Life. Representation is claimed on the following committees:

Literary and Debating Society:—P. J. Watkins and Byron Jones (Sec.).

Welsh Society:—H. Hughson, B. Jones, P. Watkins, A. Bowen and Irfon Morgan (Sec.).

Rugby Committee:—I. Morgan.

The Form was also well represented throughout the term in debates organised by the above Societies. All those named, with the addition of G. Sims and H. Williams, have taken part in these debates.

H. Hughson (piano) and H. Williams (trumpet) are the Form's representatives in the Orchestra.

Two members are also in the Rugby Team—G. Sims and I. Morgan.

I.M.

**WE SHOULD LIKE TO KNOW.**

1. Why there are so many fairy-tales in the Senior's Library?
2. Why boys look so happy leaving school?
3. Whether the votes in the Literary & Debating Society meetings are 'fixed' or not?
4. What is lacking in the 'base' section of the orchestra?
5. Why the pianist insists on playing like a genius?

P.J.W., L.VIA.

**3A FORM NOTES.**

It is with great pleasure that we look back through the term and see how many 3A boys have been prominent in the school activities.

We have about ten boys learning the violin at school and are pleased to see that Brian Johns has been regularly playing in the morning service for most of the term.

Let us now look at the sporting activities. First comes soccer. No fewer than five of our boys have played for the soccer team this season. They are: C. Williams, E. Andrewartha, R. Evans, F. J. Jones and K. Strange.

We were not so well represented in the rugby team, having only one player, namely A. Grainger.

The last sport is the aquatic one. We were pleased to see the number of boys entering the school gala and also the number of winners. We must congratulate T. Carroll, G. Maggs and B. Hinchey on getting their Intermediate Certificates in the Life Saving Society.

---

**THE MODEL AERO' CLUB.**

The Club was formed last year and made some progress in the first two terms; but after that interest slackened. It has been revived this year by about a dozen boys who were also members of the last club. We have had a few meetings in which the making of propellers was discussed, and it is hoped that we shall soon have a flying meeting.

Next term we hope that more members will join and we shall then arrange a few flying meetings in Singleton Park. Owing to bad weather, we have not been able to do this term.

B. REES (Sec. & Treasurer).

---

**OBITUARY.**

An Old Boy of the School, Ivor Radmore, was one of two victims of the canoe tragedy in Limeslade Bay last September.

We offer our sincere sympathy to his mother.

The news of the tragic death of Hilton Gardiner, Vb, from infantile paralysis was received with great sorrow and regret. He was a quiet unassuming boy, well liked by all who knew him. He took an active part in many of the School activities and was a faithful member of St. David's Church, Morriston.

We offer our sincere sympathy to his bereaved parents.

---

### A NEW BATCH OF 'OWLERS.

Synopsis is a disease.

Nauseous means speaking through the nose.

Strategy means the upper reaches of the atmosphere.

St. George was the patent saint of England.

Fissure is a man catching fish.

F.O.B. means fare on bus.

On his feet he was wearing saddles.

The three provinces of Ireland are potatoes, butter, & eggs.

The gowns of the singers were black and gold, and embroidered with vermin.

SMILER, IVB.

### BELIEVE IT OR NOT!

1. The fattest man in the world weighed 52 stone.
2. There are between 770,000,000 and 1,800,000,000 stars.
3. No one can see steam.
4. There are fish that walk in Australia, and others capable of giving electric shocks.
5. Queen Christina of Sweden abdicated disguised as a man.
6. A sponge is an animal.
7. Louis XIV of France had 413 beds in his palace.
8. Belgium is easily Europe's most populous country.
9. Strawberries are grown in the Arctic.
10. Charles II was also a jockey, and won several prizes.

B.J., L.VI.

### SCHOOL AND THE ROYAL AIR FORCE.

We offer our congratulations to the following boys who were successful in the competitive examination for the entry of aircraft candidates: the results of which have been published since the last number of the Magazine.

J. R. Leonard, VB, who was placed 22nd out of 1894 candidates examined, W. E. Latham, Granville H. Morgan, D. Leonard Hopkins, Kenneth C. Gubb.

We also congratulate Mr. E. George Davies, formerly of the Corporation Rates Department, an Old Boy of the School, who has been given a permanent commission in the equipment branch of the R.A.F.

R. A. Forman, L.VI Arts, has also left School for the R.A.F.

## THE G.W.R. WORKS AT SWINDON.

Early in the year the Scientific Society and the Metalworking Club were privileged to visit the Swindon Works. Previously a lecture had been given, illustrated by slides, in order to stimulate the enthusiasm which already existed.

The Works belong to the G.W.R. Company. The original lines ran to Devon and Cornwall but had important routes leading to Shrewsbury, Chester, Birmingham and Birkenhead. For working traffic over its 3,800 miles of line, a large number of locomotives and rolling stock is required, which require a high standard of efficiency. Thus, in order to cope with the requirements, these works were erected.

On arriving at the Works we were taken to the carriage and wagon shop. One of the most interesting features of this shop was the new saw mill and timber drying kiln. A complete change in the design of the carriage has resulted from steel entering into the construction, although the underframes are still made of seasoned wood. Large band saws cut up the wood and "sanded" it, and other circular knives morticed holes in the members. However, many girls are engaged on the upholstery part, for no machines have been invented to do this job yet. Many of these girls were expert at polishing wood panels. The guide then took us to the iron foundry after warning us to keep out of the way of men with barrows, which contained the molten cast iron which was poured into moulds.

The total output of the foundry was 9,000 to 10,000 tons per year. Overhead, large electric cranes capable of lifting 60 to 90 tons, "purred."

The wheel shop came next, in this the complete wheels were constructed. These wheels were made up of the centres, purchased as castings, and the tyres.

The erecting shop and the machine shop were more interesting than the others. For a long time we watched locomotive parts being made. Hundreds of lathes were busy turning axles, piston rods, and bearings, and one of the automatic "capstan" lathes was turning out finished hexagonal nuts at the rate of five a minute. Here and there oxy-coal-gas jet machines were cutting frames and valve yokes out of sheet metal.

Lastly we visited the rolling and stamping mills where steam hammers were forging connecting rods.

Then after two hours of walking we returned to the restaurant and at seven o'clock we caught the train for home. The return journey was uneventful because it was dark, and there was nothing to see. For days after the trip "Swindon" was the one interesting topic among the metalwork boys.

A. A. BRAZIER, 5A.

### THE ANNUAL GALA.

The Annual Gala of the School Swimming Club was held at the Swansea Baths on Thursday, 29th September. It attracted an unusually large and enthusiastic number of spectators, among whom were many Old Dy'vorians and friends.

The usual championship competitions were keenly contested and the House, Form and Novice events proved that the Swimming Club has done excellent work again this year, under the supervision of Mr. Yates.

The Demonstration of Life-Saving and Resuscitation arranged by Mr. Burgess was, as usual, an interesting feature of the Gala.

The exhibition of comedy aquabatics given by Trevor Lewis and Harry Fall, supplied the necessary relief after the tense excitement caused by the various competitions. So did the "Pillow Fights." Much credit is due to Mr. Yates, who organized the Gala and acted as M.C.

The results of the competitive events were as follows :—

Senior Championship—A. Taylor.

Junior Championship—A. Thomas.

Senior Breast-Stroke Championship—P. Morris.

Junior Back-Stroke Championship—A. Thomas.

Senior Back-Stroke Championship—C. Davies.

Junior House Squadron Championship—Roberts House.

Senior House Squadron Championship—Roberts House.

Long Plunge—G. Loosemore.

Junior Novice Race under 13—G. Maggs.

Breast-Stroke Handicap under 15—L. Gwyther.

Senior Novice—A. Brooks.

Junior Breast-Stroke Championship—J. Davies.

One Length Handicap under 13—K. Strange.

Breast Stroke Handicap over 15—P. Morris.

Diving Competition—W. Price.

Old Dy'vorians' Championship—T. Lewis.

Junior Novice under 14—K. Evans.

One Length Handicap for recent non-swimmers—S. West.

**I'D LIKE TO KNOW.**

My elder brother frequently calls me a "cheeky brat,"  
 He says "a kid like me" must not do this, and not say that.  
 He had no elder brother when he was very wee,  
 I'd like to know who taught him how to treat a kid like me?

My elder brother often gets a jolly lot of treats,  
 While I am only taken for dull walks about the streets,  
 I have to wear his out-grown clothes; it does not seem  
 quite fair.  
 I'd like to know whose clothes my elder brother had to wear?

My elder brother keeps on getting older still,  
 I try to catch him up, but I'm afraid I never will,  
 But I've a friend who's got a baby sister—quite brand new,  
 I'd like to know if I could be an elder sister too;

My elder brother often has his school friends 'round to tea,  
 They have a lot of secrets which they never share with me.  
 They generally like to turn me out to play outside the door,  
 And what I'd like to know is—what are elder brothers for?

D. SCOTT, 3c.

**FORM NOTES—2A.**

Apart from its usual quota of master minds (ahem!) in this year, 1938, the form of 2A is surely blessed with personalities, distinct, if not unique!

Ioan Lewis—Who graces the goalmouth of the Junior School Soccer Team.

Gerald Kiley—Another manipulator of the leather sphere who bids fair to follow in the footsteps of his brother, Tom, who is an old 2A boy, and occupies an established position in the Junior School Soccer Team.

Terence Murphy—Begorra!—possessed of all an Irishman's wit and ever ready to exercise it. Sure, and his fun keeps even those who sleep awake, so it does!

Barrie Poulson—Yet another of the 'beanstalk' breed who, who knows?—may yet outgrow his celebrated brother, and perhaps, make an attempt on the altitude record, and, without whom this list could not be called complete.

Kenneth Jones and Kenneth Winston—Two 'K's' undoubtedly men of weight and substance.

In gym, Roberts House is leading by a small margin of points.

### THE SCHOOL ORCHESTRA.

The orchestra continues to make good progress, many new players having been introduced. A most pleasing feature of the term, has been the increased number of engagements which have been offered to the orchestra. On October 2nd, twelve members of the orchestra visited Babell Chapel, Cwmbwrla, to accompany the Singing Festival. They also provided a few items which were well received by the audience. A few weeks later, a section of the orchestra gave a Charity Concert at Townhill. Glyn Jones (trumpet) and Harry Miller (violin) rendering solos. Early next term, members of the orchestra contemplate paying a visit to Horeb Chapel, Morriston, and then to the Y.M.C.A., Swansea, and we hope that these concerts will turn out to be as successful as the others. The members of the orchestra continue to show great enthusiasm, and this has been an important factor in its success, not forgetting the unceasing efforts of Mr. G. Roberts.

H.H.

---

### MR. E. PHILLIPS.

The news that Mr. E. Phillips intends to retire at the end of this term was a surprise to all. The secret had apparently been well kept, and the announcement made by Mr. John after prayers on Dec. 8th, was quite unexpected.

Mr. Phillips joined the Staff many years ago, and during his long period of service has endeared himself to hundreds of pupils.

To the present generation he is associated with the mysteries of Mathematics; but for some years he was engaged in teaching Chemistry.

Mr. Phillips, an "Old Boy," is a familiar figure at all functions organised by the "Old Dy'vorians." He was a pupil at the School when it was domiciled in Trinity Place and known as the "Higher Grade School."

We are all sorry that he is leaving us, and unite in wishing him a long and happy period of retirement.

B. Jones, E. Rees.
